### DRW-560S High Speed Electrical Winch

Ductrunner™ manufactures highly sophisticated pipeline mapping tools that often are pulled through pipeline infrastructure. Despite the sophistication of our pipeline inspection tools, most problems encountered in the field are of an operational nature.

The DRW-560S high speed winches are specifically designed to improve operational efficiency of Ductrunner™ mapping tools or any other item that needs to be pulled through a pipe. Furthermore, their compact size and limited weight make the DRW winches the most powerful in their class.
