

# ParaTrack Gyro Module

## Prime Horizontal

The ParaTrack Gyro Module is the latest in a long line of innovations for the HDD market. With no concern of magnetic interference from nearby active utility lines, shorepiles, ship traffic or other transportation activity, drilling may be carried out confidently, regardless of surrounding conditions. The ParaTrack Gyro Module runs in conjunction with the ParaTrack Steering Tool, providing the ability to tie in with the entire ParaTrack System of tools and software.

### The ParaTrack Gyro Module Advantage

#### Features

- Fiber optic north seeking gyro system
- Compatible with the entire ParaTrack line of Steering, Tracking and Surveying tools

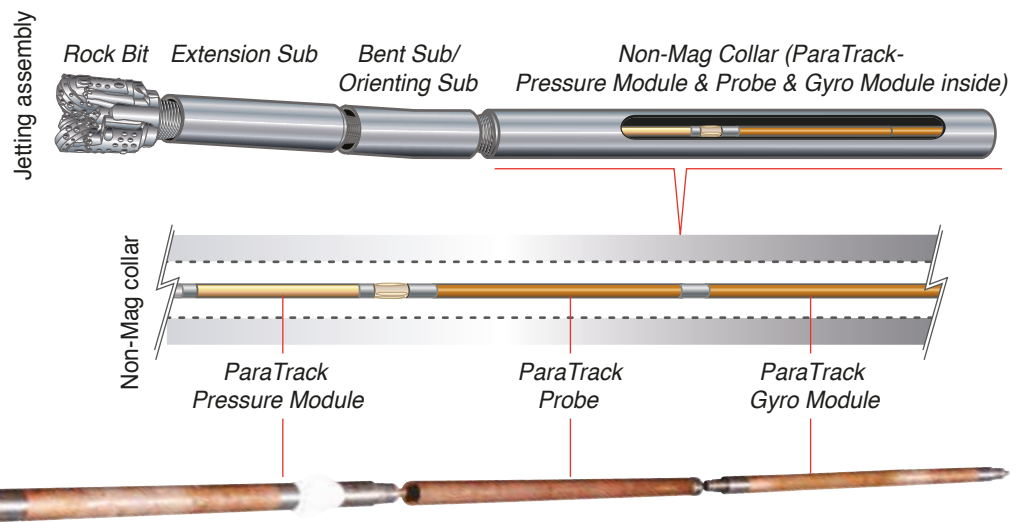

#### Benefits

- Accurate surveying in cases of severe magnetic interference
- No specialized handling or personnel required
- Surveys immune from drillstring vibration

#### Applications

- Surveying in densely developed urban areas
- Verification and correction of magnetic azimuth in long unguided sections

The ParaTrack Gyro Module is especially effective for initial surface entry, while absolute position may then be verified via the ParaTrack-2 Guide Wire or Beacon Tracker, providing confidence that the bore is placed properly relative to the planned exit location prior to punch out.
