

Elkhorn River Crossing

Gyro Module and ParaTrack 2

Elkhorn River:

Nebraska, USA

Distance: 883m (2,900')

Pipeline: 203mm (8") gas line

262m (860') entry coil

Tracking used: Gyro Module & ParaTrack 2

Technique used: River Crossing

A small entry coil was deployed in combination with the **Gyro Module** to guide the pilot hole from the river towards the exit. A small exit coil was also deployed to confirm the exact exit position, coming out exactly on target.
